

Interface

Bar at the bottom with different options (notifications, maps, etc).

jaime82206

System

Use the location of the user to identify where they are and where the nearest restroom is.

jaime82206

Reviews

There is a list of bathrooms in the area, it is 1-5 stars

jaime82206

Maps

The previously mentioned bubbles will have a symbol that indicates if they're for staff or students only.

jaime82206

Miscellaneous

If you are a verified owner of the restroom, you would get an alert if someone rated your restroom.

jaime82206

Place for the map, which will be in the center.

jaime82206

Be able to put your USCID to show restrooms that are only accessible to students/staff

jaime82206

The way that reviews are made is based on how many people gave it a certain number of stars.

jaime82206

Directions on the top would be based on distance and overall time to get there. Default setting would be for walking.

jaime82206

Different settings to change languages in the app

jaime82206

Little bubbles that show where a restroom is on the map.

jaime82206

The bar at the bottom would navigate you to different screens.

jaime82206

The ratings would be based on the overall cleanness, accessibility and availability.

jaime82206

There will be option for bikes/scooters.

jaime82206

You can have a profile for reviews/ ownerships

jaime82206

Above the map would be where the directions are.

jaime82206

The map on the app would integrate with the default map app on your phone

jaime82206

The reviews should be able to have a comment on them.

jaime82206

When you click on the bubble it shows the rating of the bathroom.

jaime82206

If you are a verified owner, you can change settings about the availability of your restrooms
